

ED ASSESSMENT RESULT

It appears that you are experiencing moderate to severe erectile dysfunction, which is likely having a negative impact on your daily life and relationships.

SCORE BREAKDOWN¹

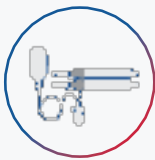

1 - 7 : Severe

8 - 11 : Moderate
to Severe

12 - 16 : Mild
to Moderate

17 - 21 : Mild

YOUR PATH TO RECOVERY

Applied in a short procedure and completely concealed within the body, a penile implant facilitates spontaneous sexual activity, offering a permanent solution to erectile dysfunction.

Oral drugs are consumed one hour prior to sexual engagement to enhance blood circulation and the capacity to achieve and sustain erections.

Vacuum Erection Devices (VEDs) offer a non-invasive, medication-free approach to addressing erectile dysfunction during sexual experiences.

Intraurethral suppositories deliver medication straight into the urethra to enhance circulation of blood.

The act of self-administering medication into the penis with a tiny needle aids in increasing blood flow and the capacity to achieve an erection.
